

New Template: MP Sijo

We released MP Sijo, a bright general purpose template with a variable two or three columns layout. It can be used for the most kinds of websites: Business pages, shops, e-zines, communities and many more.

The template package includes the .psd Photoshop file we use to create the templates images and the .psd source to create your own header images.

The template provide eight different modulepositions: user1, user2, user3, user4, user5, user7, left and right and can be used with Mambo 4.5.1+ and all Joomla! versions. The template comes without any tables and based on XHTML 1.0/CSS 2.0 valid code.
